

Enterprise software supply chain management

Empowering organizations to create and maintain secure, quality, and innovative software at scale.

DEV

- ✓ Quickly identify the best components to reduce re-work and technical debt.
- ✓ Remediate open source policy violations with precise intelligence in existing tools (IDEs and SCM).
- ✓ Automate dependency management for direct and transitive dependencies.
- ✓ Provide accurate and actionable feedback to fix bugs during code review.

SEC

- ✓ Powerful policy engine for enterprise scale security.
- ✓ Repository Firewall to block bad components before ever entering your environment.
- ✓ In-depth security research – best data in the industry.
- ✓ Intelligence for security, license, and component quality data across all languages.
- ✓ Binary scanning of applications for the most accurate component details.

OPS

- ✓ Generate a SBOM for production/legacy apps.
- ✓ Continuously monitor for new risks.
- ✓ Deliver stable builds with a binary repository.

LEGAL

- ✓ Clear view into license obligations and attributions.
- ✓ Automate license reviews.
- ✓ Access exact data early in the SDLC to expedite release frequency.

Integrate with your favorite tools

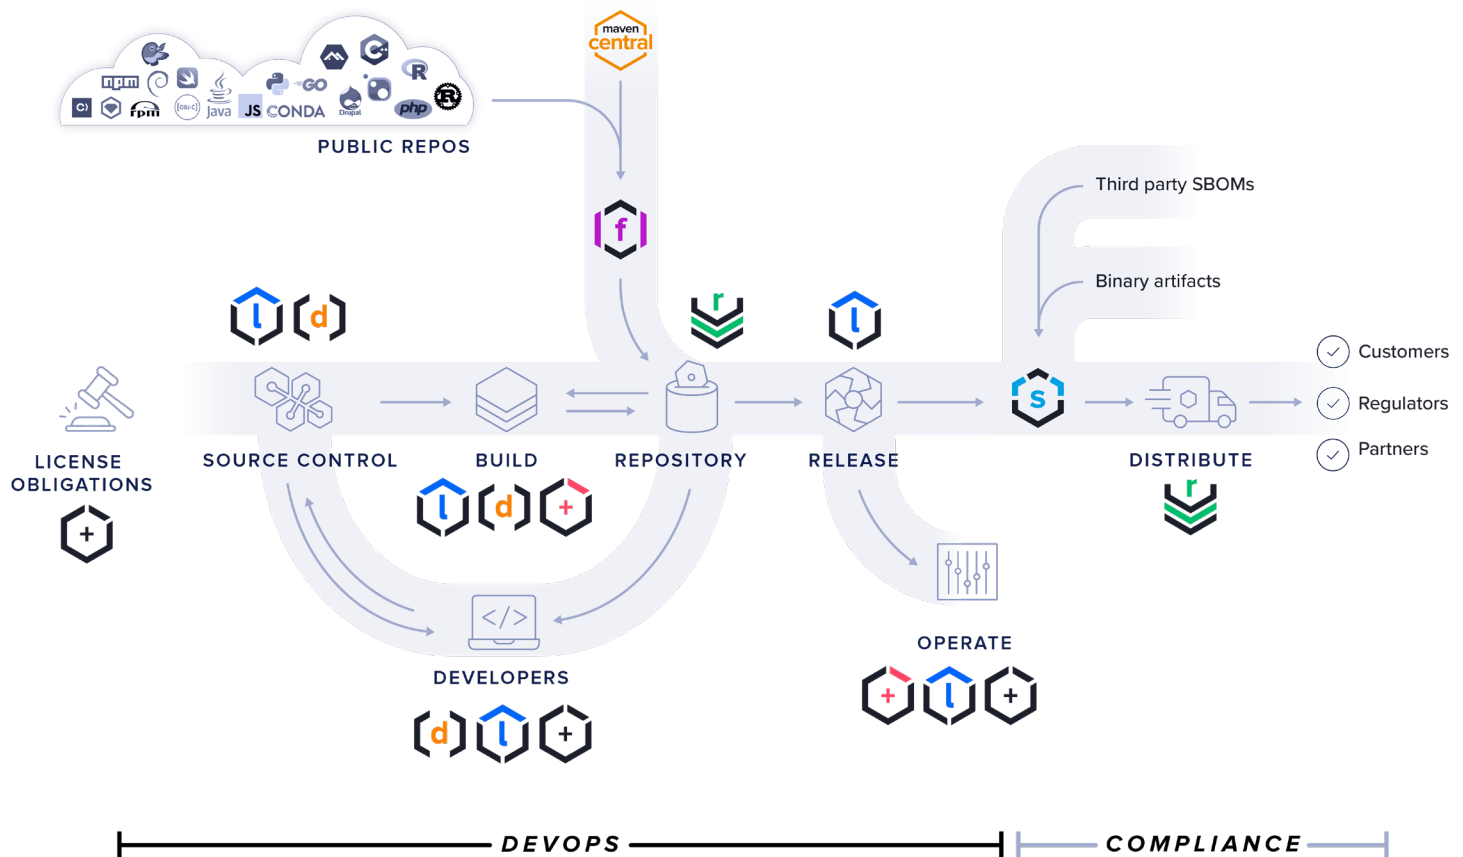

Sonatype has you covered with 50+ language and integrations across leading IDEs, source repositories, CI pipelines and ticketing systems.

Secure your software supply chain

Enable fast, secure software innovation

Maven Central Repository
World's largest Java repository, administered by Sonatype

Sonatype Lifecycle
Achieve faster release velocity with reliable SDLC security automation

Sonatype SBOM Manager
Simplify Software Bill of Materials compliance and monitoring

Sonatype Nexus Repository
Smart repository to manage and build artifacts, trusted by more than 150K organizations

Sonatype Developer
Prioritized recommendations and reliable automations for developer velocity

Advanced Legal Pack
Automate and streamline OSS component licensing and legal compliance

Sonatype Repository Firewall
Automatically spot and stop risk before entering your repository

Sonatype Container
Protection for container network, process and file system
